

TRANSFORM CULTURE

AN EXECUTIVE LEADERSHIP PROGRAM THAT DELIVERS MEASURABLE CULTURE TRANSFORMATION

MEASURE AND MANAGE YOUR CULTURE

CULTURE DRIVES ENGAGEMENT AND IGNITES PASSION FOR YOUR PURPOSE!

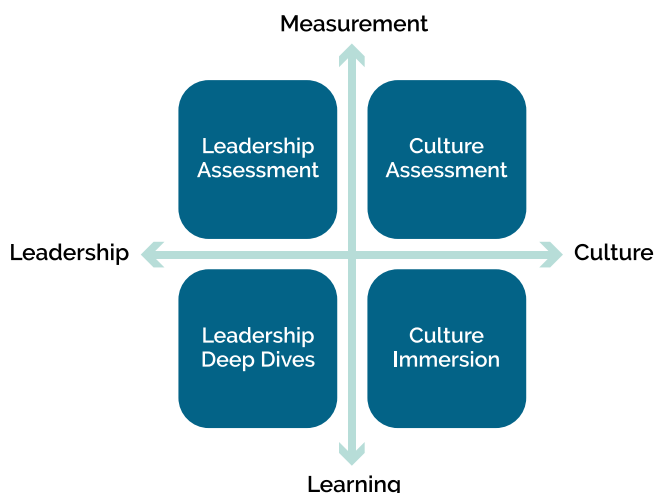

You may have the world's greatest product and go-to-market strategy, but if you do not have a culture and that emphasises healthy, constructive behaviour, you will not realise the full potential of your workforce, and your business will not be enabled to sustain high performance.

"What gets measured gets managed".
Peter Drucker

Most organisational leaders understand the importance of culture. However, most do not know how to tangibly measure and manage culture.

This comprehensive 12-month program provides organisational leaders with a system to measure, manage and enhance their most powerful intangible assets driving performance – the organisations' culture and leadership.

The **TRANSFORM CULTURE** program includes four key components that are able to be delivered as single elements or in combination:

- **Leadership assessment** of your leadership team using Human Synergistics Life-Styles Inventory (LSI).
- **Culture assessment** of the whole team using the Human Synergistics Organisational Culture Inventory (OCI) and Organisational Effectiveness Inventory (OEI).
- **Culture Immersion** week to develop the capacity of leaders and teams to contribute to positive, productive workplace cultures.
- **Leadership Deep Dive and Coaching** with the leadership team to develop leadership capability and deliver culture plans.

'Blue cultures are SUSTAINABLE.'

DELIVERING MEASURABLE OUTCOMES

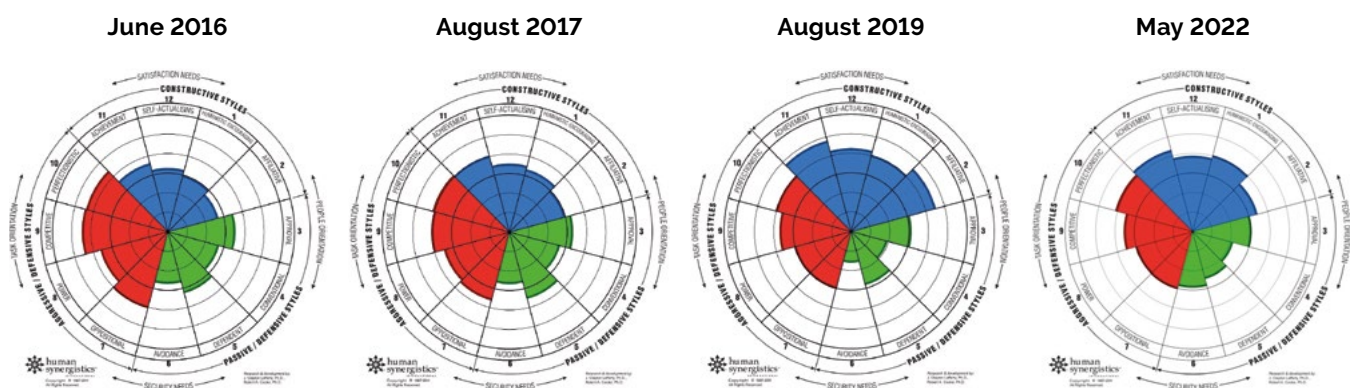

THE HUMAN SYNERGISTICS CIRCUMPLEX® IS OUR MEASUREMENT SYSTEM

As an accredited Human Synergistics practitioner, Stephanie Bown adopts the *Human Synergistics Circumplex®* – the measurement system for culture and leadership. The Circumplex® measure twelve different styles of thinking and behaving. These styles are clustered into three colours; blue, green and red.

- **BLUE styles are constructive behaviours.** These cultures lift workplace engagement, positively impacting business results.
- **GREEN and RED styles are called defensive behaviours.** These cultures foster the conditions that drive disengagement, negatively impacting the bottom line.

THE DIFFERENCE BLUE MAKES

Global Executive team client of Stephanie Bown • 2016 – 2022

Blue styles drive the best overall performance outcomes. Blue cultures are SUSTAINABLE. We observe revenue growth, superior service and product quality, less stress and less turnover. With continuous focus – executive teams can and do, shift from red or green to blue over time.

HOW WE MEASURE LEADERSHIP

Leaders gain 360-degree feedback USING the LIFE-STYLES INVENTORY (LSI).

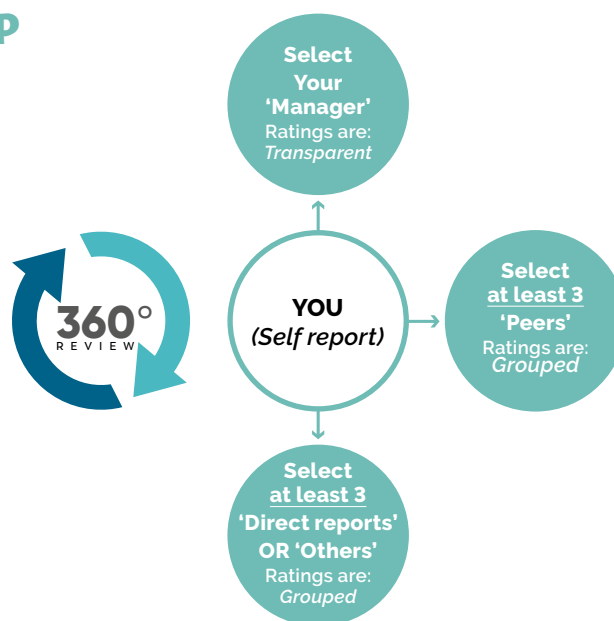

The LSI assesses individual styles of thinking and behaving as mapped on the circumplex, as well as perceptions of personal effectiveness and satisfaction.

Each leader completes a self-assessment.

Selects up to ten (10) others to give them feedback, categorised as their manager, peers, direct reports, or others.

They are asked to select:

- People at work who know them well
- People who's opinion they respect and who they can follow up with afterwards
- People they believe will give them honest feedback.

*75min online confidential one-on-one debrief session;
reviewing self vs other feedback drawing insights on key
opportunities for realising personal potential.*

*Full day debrief workshop (as part of culture immersion)
where participants are encouraged to share results in
for the purpose of shared learning and growth.*

WHAT IS CULTURE?

Human Synergistics defines culture as:

'The shared values, norms and expectations that govern the way people approach their work and interact with each other'.

Their research shows that when there is a high degree of alignment between your 'ideal culture' (your espoused values and beliefs) and your 'actual culture' (the experience employees have every day) there are strong outcomes at the individual, team and organisation levels. That is, people are more engaged, demonstrate better teamwork, and deliver better quality outcomes than organisations that do not live their espoused values.

The culture diagnostic involves all staff completing two diagnostic tools designed by Human Synergistics:

THE ORGANISATIONAL CULTURE INVENTORY OR OCI

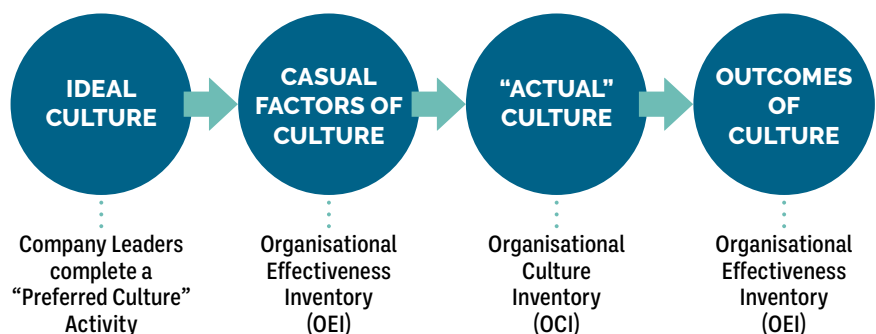

This measures your ideal vs actual behavioural styles that are then translated onto the Human Synergistics circumplex, providing a visual representation of passive, aggressive and constructive behaviours in your culture.

THE ORGANISATIONAL EFFECTIVENESS INVENTORY OR OEI

This measures the causal factors impacting culture, as well as the outcomes of culture on an individual, team and organisational level.

HOW WE MEASURE CULTURE...

Culture is complex – there are many factors working together to drive culture. Stephanie adopts the Human Synergistics diagnostics to measure;

HOW WE DRIVE TRANSFORMATIONAL CHANGE

The learning components of the TRANSFORM program are designed to leverage insights gained from measurement; and to “close the gap” between an your ideal culture (espoused values) and your actual culture (lived values).

Objectives to:

- Develop leadership capacity
- Amplify values to enhance culture
- Drive sustained high performance
